8 BENEFITS OF BLACK & VEATCH'S

Field Workforce Management Platform

Data flows fast and furious with a distributed workforce that uses many smart apps. Our Field Workforce Management Platform merges resource and field management data in real-time, and integrates other apps, systems, and data hubs under one sleek architecture.

1 PLUG & PLAY TECH

Modular architecture enables a customized system to best meet the needs of each client and optimize efficiency. Built for future innovation.

2 EAGLE-EYE PROJECT VISION

Unifies the *back office, front office,* and *field office* systems for superior project control via one comprehensive architecture.

3 HAPPY APPS

Helps apps work together better to *drive up data value.*

4 BEST-FIT STAFFING

Automatically selects the right partners for the requested job, considering scope, location, skills, safety record, and availability. Quality partners means quality assurance.

5 CONSTANT COMMS

Provides a *single port of communication* for partners and project management staff for speedy and responsive digital communications.

6 STREAMLINED ADMIN

Automates business functions, like work orders, change requests, and status updates. *Reduces paperwork* through a digital, time-stamped documentation process.

7 RELIABLE RECORDS

Archives project data uploaded from the field, like site photographs, to help communicate and document project status or issues.

8 BIONIC OPERATIONS

Integrates systems and apps to *create efficiencies* across project management for time and cost savings.
